New Delhi-110 002

The Council's innovative approach to the development of instructional materials is often reflected in many of its publications. One of its geography books, for instance, provided not only topographic maps on a scale, 'one inch to a mile', but also incorporated aerial photographs of the areas shown in the map. The book on Subramania Bharati contained Tamil songs in three scripts side by side—Tamil, Devnagari and Roman—with translations in Hindi and English.
